Steve,

Look forward to hearing from you, I reviewed the Red and Bonita entry plans I have on file and will do at least a preliminary briefing with the teams. San Juan Mine Rescue and GCC Energy teams have strengthened our cross training efforts since our combined response to the Revenue Mine last winter. Our responses are now fully coordinated and our notification process has been streamlined, we can put four teams on-site in very short order.

Jess - great to hear from you and thank you for the quick reply. I will provide the details but it's basically the same area with a new mine added.

In addition to the Red and Bonita mine, we will work at the Gold King Mine - 7 level.

Thanks and I'll look forward to talking later.

Steve

Steve,

Good to hear from you again, still here and kicking, new contact information is listed in my closing. The home phone usually works the best if you need to call and of course you can e-mail me the pertinent information. I will alert the team members as soon as I know your dates; if it is the same project again I should still have most of the info we need for a response on file.

Hello,

I am attempting to make contact with someone regarding a need for a stand-by status mine rescue team for work near Silverton, CO. The contact information that I have for Jess Fulbright is not current, and Jess is who I coordinated with last year for the same support.

Please let me know if this is support that the San Juan Mine Rescue group can assist with providing.

Thank you,

Steve
